### When to use Lime and Plaster.

Land doctoring, like all other doctoring, should be performed with an intelligent reference to the nature of the disease, and the adaption of the remedy.—Gen. Bierce, of Akron, is a careful observer of natural phenomena and with a successful cultivator. He has recently contributed the following valuable suggestion to the *Summit Beacon*:

The value of Lime or Plaster, as a manure, depends upon the component parts of the soil to which it is applied. All land has more or less sulphuric acid in it caused by the decomposition of iron pyrites. The presence of this acid may generally be known by the appearance of the soil, and particularly of the stone. If there is any iron rust, or oxide of iron, in the soil, or in the stone; or on the top of the water that filtrates through the soil; or if the water is hard, it indicates the presence of sulphuric acid.

If land on which grass seed is sown, is "slow to catch," or sod over; or catched in patches, it indicates the presence of sulphuric acid.

If the roots of clover and herds grass in the spring, stand two or three inches out of the ground, and in detached parcels, with bare ground between—it is the work of sulphuric acid. On such land plaster is a positive injury.

If clover and tame grasses die out, and are succeeded by wire grass, sorrel or sour dock, it is caused by sulphuric acid. Put on lime and keep off plaster.

The reason why plaster should not be used on land charged with sulphuric acid, is that plaster is composed of lime and sulphur, and applying that is adding more of that with which the land is already overcharged. On such land apply lime, which unites with the sulphuric acid, and forms plaster. The lime thus neutralises the acid; and the acid thus neutralises the lime, and they form a compound nutriment for vegetation.

The reason why the ground appears so hard, where the earth is charged with sulphuric acid, is that the old stubble has been eaten up by the acid.

The sulphuric acid in plaster, applied to land not overcharged with that substance, decomposes vegetation and fits it for nourishing the living plants. When there is an excess of the acid it eats up the vegetation, both dead and living.—This is the reason why soils overcharged with the acid are always deficient in vegetable matter. And soils free from it, have an excess of vegetable matter in a decomposed state.

The presence of this acid is the cause of sorrel and sour dock, and sour grass. The land is literally sour, and Nature is trying to throw it from her stomach, through these excrecences.

The rule then is, if your land has too much sulphuric acid, or is sour, give it a good coat of lime; if destitute of acid apply plaster.

### Charcoal and Salt for Sheep.

A contributor to the North-western Cultivator writes—"It is generally conceded that wet pastures are favorable to the health of sheep. I have kept a flock for four years on a pasture of this description—for the first two years with unfavorable results. My sheep were unhealthy and many of them died. I ascribed it to the wetness of my pasture. Upon the recommendation of an old farmer, I gave the sheep charcoal, mixed with salt. The beneficial effects of this mixture were soon apparent. My sheep presented a more healthy appearance. I have continued the treatment, and the animals have continued to thrive. I suppose the medicinal qualities of this mixture consist in the disinfecting property of the charcoal. And in the invaluable tonic and alterative properties of the salt, we may add: for, like many other remedial agents, this article, when given in small doses, stimulates the digestive functions. In larger doses it is cathartic."—*American Veterinary Journal*.

It is almost as difficult to find a house to live in in Cincinnati as it is at Melbourne, Australia.

"Charles, my dear," said his wife, "the wind is dreadful." "Put a peppermint lozenge out of the window, my dear, it's a capital thing for wind."

GENDER AND CASE OF AN EGG.—The following occurred in a school not a hundred miles from Woodstock, Vermont:—Teacher.—What part of speech is the word egg?

Boy.—Noun, sir.

Teacher.—What is its gender?

Boy.—Can't tell, sir.

Teacher.—Is it masculine, feminine, or neuter?

Boy.—Can't say, sir, till it's hatched.

Teacher.—Well, then, my lad, can you tell me the case?

Boy.—Oh, yes; the shell, sir.

**FIFTY DOLLARS FORFEIT.** Dr. Hunter will forfeit \$50 if failing to cure any case of secret disease that may come under his care, no matter how long standing or affecting. Either sex are invited to his Private Rooms, 28 North Seventh Street Philadelphia, without fear of interruption from other patients. Strangers and others who have been unfortunate in the selection of a Physician are invited to call.

**IMPOTENCY.** Through unrestrained indulgence of the passions, by excess of self abuse, the evils are numerous. Premature impotency, involuntary seminal discharges, wasting of the organs, loss of memory, a distaste for female society, general debility, or constitutional derangement, are sure to follow. If necessary, consult the Doctor with confidence; he offers a perfect cure.

**READ AND REFLECT.**—The afflicted would do well to reflect before trusting their health, happiness, and in many cases their lives, in the hands of Physicians ignorant of this class of maladies. It is certainly impossible for one man to understand all the ills the human family are subject to.—Every respectable physician has his peculiar branch, in which he is more successful than his brother professors, and to that he devotes most of his time and study.

**YEARS OF PRACTICE.** exclusively devoted to the treatment of diseases of the sexual organs, together with ulcers upon the body, throat, nose, or legs, pains in head, or bones, mercurial rheumatism, stricture, gravel, irregularities, disease arising from youthful excesses, or impurities of the blood, whereby the constitution has become enfeebled, enables the Doctor to offer speedy relief to all who may place themselves under his care.

Medicines forwarded to any part of the United States.—Price five and ten dollars per package. [Nov. 18, 1852-15.]

### OFFICE TO PROCURE

### Soldiers' Land Warrants.

By a recent Act of Congress it is enacted, That each of the surviving, or the widow or minor children of deceased commissioned and non-commissioned officers, musicians, or privates, whether of regulars, volunteers, rangers or militia, who performed military services in any regiment, company or detachment in the service of the United States, from the war with Great Britain, declared by the United States on the eighteenth day of June 1812, or in any of the Indian wars since 1790 and each of the commissioned officers who was engaged in the military service of the United States in the late war with Mexico, and shall be entitled to lands as follows:

Those who engaged to serve twelve months or during the war, and actually served nine months, shall receive one hundred and sixty acres; and those who engaged to serve six months and actually served four months, shall receive eighty acres; and those who engaged to serve for any or an indefinite period, and actually served one month, shall receive forty acres. Provided, that wherever any officer or Soldier was honorably discharged in consequence of disability in the service, he shall receive the amount to which he would have been entitled if he had served the full period for which he was engaged to serve.

Under the above act, and the acts of Congress generally, the subscriber offers his services as agent to procure Land Warrants for those entitled to receive them, as above specified. He may be found at his office in Stroudsburg, S. C. BURNETT.
